

ANDERSON CONSTRUCTION FACILITIES UPGRADE

LOCATION: MANDURAH, WA

Located in Mandurah, Western Australia, Anderson Construction is a proud family business run by brothers James and John. Along with their highly skilled team, they have built a reputation of delivering honest customer service and innovative industrial construction solutions for their clients across Western Australia.

Anderson Construction has a longstanding relationship with Larnec, regularly supplying their customers with Larnec products for their commercial and rural sheds. As their own operations continue to expand, the brothers decided to upgrade their warehouse and office facility. Larnec was engaged to provide personal access doors between their warehouse and office, as well as an exit door for their warehouse. The Sentry® 200.47 pre-hung, fully metal-clad industrial personal access door was chosen, as it met their requirements for durable, reliable doors providing increased security.

Below: Anderson Construction Facility.

We chose Larnec because of their quality products. Specifically, the Sentry® 200.47 doors are pre-framed, and quick and easy to install, which saves us a lot of time.

PRODUCTS SUPPLIED:

1 x **200.47.920**
(warehouse exit door)

1 x **200.47.920** with **viewing panel** and **door closer**
(between warehouse and office)

Describing their experience with Larnec on this project, as well as previous projects, James commented,

“We like the product and plan to keep engaging with Larnec well into the future. Their ordering system is easy, with a comprehensive order confirmation sent with each order. Despite manufacturing being located in Victoria, their lead times to W.A are highly competitive, and orders are delivered in full and on time, helping us to plan accordingly with our customers.”

At Larnec we take pride in working with reputable construction businesses and look forward to continuing to grow our relationship with Anderson Construction moving forward.

PRODUCT PROFILE:
SENTRY® 200.47

AUSTRALIA'S LEADING CYCLONE-RATED INDUSTRIAL DOOR

When it comes to the Sentry® 200.47, you'll be hard pressed to find a competing product that matches the specification and quality of this high-security PA door. Our fully metal clad personal access door can be used for sheds and garages that need a durable, reliable PA door for increased security.

Available in the complete Classic & Contemporary ranges of COLORBOND® steel colours, with a standard door size of 2040mm x 820mm, with 920mm and 1100mm available. We can also manufacture inwards opening doors when external clearance is tight, and your structure needs another solution.
