

# COMPASS SHEDS & GARAGES

LOCATION: MAYFIELD WEST, NSW

For sheds, garages, carports, barns, patios, and more in Newcastle, the Hunter Valley, and beyond, Fair Dinkum Builds Compass Sheds is your local team of choice. With over 15 years of local experience, they design beautiful, functional structures to suit customers' needs. They offer a full construction service, arranging council requirements and providing qualified licensed contractors.

Recently, Compass Sheds & Garages was engaged by a local farmer to supply and install multiple louvre vents for a farm shed. The customer's main objective was for air to pass through the shed freely, while keeping out unwanted elements such as water, dirt, and debris.

After consultation with their customer, Larnec's Venttec® Wall Vents were recommended due to their superior quality and ease of install.

We chose Larnec vents for our recent construction because Larnec provides the best vents in the market, along with their personal access doors. Some supplier products require our builders to spend more time with installation.

**PRODUCTS SUPPLIED:**

VENTTEC Fixed Wall Vents

Compass Sheds & Garages swiftly handled the installation of Larnec vents, leaving the customer highly satisfied with the final result. Their expertise and professionalism ensured that the installation process was seamless, delivering a high-quality outcome that exceeded expectations.

“Excellent customer service. Always someone available to answer questions about products and availability. Quality of products is great. I’m always able to get the right product for the job.

The builders we use prefer to install Larnec Doors and Vents over every other brand they have handled. This is due to the ease of installation and quality of products.”

**PRODUCT PROFILE:**  
**VENTTEC® FIXED WALL VENTS**

**INDUSTRY-LEADING WALL VENTS.**

- » Strong and durable fixed wall vents
- » Option for bird or insect mesh
- » Units can be joined
- » Quick and easy to install
- » Made in Australia

**APPLICATIONS**

- » Industrial building wall vents
- » Shed and garage wall vents
- » Factory wall vents

Larnec designs and manufactures wall hatches and vents for a vast range of industries. We’ve got all your business needs covered.

Our wall hatches are suitable for farm and shearing sheds, shipping container modifications, and canteen serving hatches. Our fixed vents can be installed for industrial building walls, shed and garage walls, and factory walls.

The Larnec team can recommend hatches and vents to suit your unique business needs. And if none of our models fit your situation,

we’ll custom design and build hatches and vents that do.

We are looking forward to partnering with Compass Sheds & Garages into the future, providing high-quality products and excellent service to meet their needs.

If you have any upcoming projects and would like to witness our capabilities firsthand, please get in touch. We would be thrilled to discuss how we can contribute to your own unique projects and goals!
