

CYCLONE-RATED PERSONAL ACCESS

DOORS FOR AUSTRALIA'S MINING CAMPS

AUSTRALIAN-MADE DOORS, ENGINEERED FOR MINING CONDITIONS

In the mining industry, standard doors aren't adequate. That's why Larnec offers a range of products designed and engineered to mining conditions. We can customise the door & frame exterior, door hardware, and locksets to suit the environment. Our personal access doors are built to endure extreme weather, ensuring the safety of mine workers and equipment during severe conditions.

Specialists in Mining Industry Doors

Larnec specialises in designing and supplying doors engineered to mining specifications. Whatever your requirements, we'll design accordingly. Whether you need doors to withstand heat, airborne salt, dust & water ingress or cyclonic wind & debris, our experts can recommend the right door for the job with compliance certification to back it up.

Buildings on mining sites are generally transportable and require quick, easy-install doors. At your mining site, you might have temporary or permanent buildings for applications like:

- **Site sheds**
- **Accommodation**
- **Laundry**
- **Recreational**
- **Ablution**
- **Kitchen/Dining**

UPGRADE MINE SITE SAFETY WITH LARNEC'S CYCLONE-RATED PERSONAL ACCESS DOORS.
