

STOCKMAN SHEDS

LOCATION: TOOWOOMBA, QLD

Our long-standing customer, Stockman Sheds, is a leading provider of versatile sheds, offering solutions for farm, residential, industrial, and barn-style needs. Based in Toowoomba, Stockman Sheds has expert teams constructing sheds in Brisbane, the Sunshine Coast, the Gold Coast, Ipswich, and surrounding areas. They also offer DIY shed kits delivered Australia-wide.

They are dedicated to helping their customers maximise their backyard space, creating sheds that not only fulfill their dreams, but also protect their tools,

cars, trailers, boats and more! Their tailor-made sheds provide a sanctuary for work, privacy, reflection, or peace, designed to be reliable and enduring. Whether customers need a rural shed for agricultural machinery, an industrial shed for manufacturing, or storage, Stockman Sheds is committed to delivering solutions.

We caught up with Director, David Jonsson, to find out about some of their upcoming projects, and why Larnec continues to be their supplier of choice for all their personal access door needs.

We use the standard single skin Larnec 820 door on every single one of our residential shed projects.

Prior to starting Stockman Sheds, we had built every shed brand under the sun and every type of PA door you can get on the market. When we started Stockman, we made the decision that we would only use Larnec's doors, as out of all the ones we

had used in the past, they were by far the easiest to install and they were also by far the highest quality. This keeps our builders happy on the install side of things and our customers happy as they're getting a great product. On top of being what we believe the best PA door on the market, the doors are made locally, and we've made the important decision of sourcing all of our shed components in Australia.

Single skin 200.47 820mm
Personal Access Door

“We use them on all our projects, we’re always very happy with the outcome and our customers love the quality of the doors.

We’re big fans of Larnec and we will continue to use Larnec on all of our shed projects. The customer service has been great, and your doors are always made to a really high standard. We’ve had very little to no issues with any damaged deliveries and the team have gone above and beyond to accommodate us, even coming up with their own initiatives to consolidate and send our orders to save us freight. There are cheaper knock offs on the market but at the end of the day, we’re looking for quality and genuine Australian made. Happy days!”

PRODUCT PROFILE:
SENTRY® 200.47 PA DOORS

SENTRY 200.47 PERSONAL DOORS.

- » Strong and durable fixed wall vents
- » Option for bird or insect mesh
- » Units can be joined
- » Quick and easy to install
- » Made in Australia

APPLICATIONS

- » Industrial building wall vents
- » Shed and garage wall vents
- » Factory wall vents

Larnec designs and manufactures wall hatches and vents for a vast range of industries. We’ve got all your business needs covered.

Our wall hatches are suitable for farm and shearing sheds, shipping container modifications, and canteen serving hatches. Our fixed vents can be installed for industrial building walls, shed and garage walls, and factory walls.

The Larnec team can recommend hatches and vents to suit your unique business needs. And if none of our models fit your situation,

we’ll custom design and build hatches and vents that do.

We are looking forward to partnering with Compass Sheds & Garages into the future, providing high-quality products and excellent service to meet their needs.

If you have any upcoming projects and would like to witness our capabilities firsthand, please get in touch. We would be thrilled to discuss how we can contribute to your own unique projects and goals!
