

URBNSURF MELBOURNE

Location: 309 Melrose Dr, Melbourne Airport VIC 3045

OVERVIEW

URBNSURF Melbourne is one of Australia's most ambitious and distinctive developments, the country's first urban surfing park delivering world-class surf experiences for all ages and abilities, and just minutes from Melbourne Airport.

URBNSURF is a multi-use precinct, blending sport, retail, hospitality and education. A key architectural feature across the site is the use of converted shipping containers and modular structures, repurposed into highly functional buildings.

KEY FACILITIES

- Front entry and admissions
- Surf Academy facilities
- Three Blue Ducks restaurant building
- Rip Curl Surf Shop

Lar nec was engaged to supply personal access doors across these container-based structures, supporting both the functional demands of the site and the long-term durability required in a high-exposure, coastal-style environment.

THE CHALLENGE

- ❗ Converted shipping containers requiring doors that integrate seamlessly into non-traditional structures
- ❗ High-traffic public access, spanning retail, hospitality and education use
- ❗ A need for longevity, reliability and low maintenance over the life of the precinct

THE LARNEC SOLUTION

- ✅ Compatibility with container construction, allowing for straightforward integration into steel structures
- ✅ Long service life, suited to public-facing, high-use environments
- ✅ Ease of installation, helping streamline build programs and reduce on-site complexity

Larnec supplied personal access doors purpose-suited to modular and container-based buildings, offering a robust and practical access solution across multiple buildings within the URBNSURF precinct.

A PARTNER FOR MODULAR & CONTAINER CONSTRUCTION

This project highlights Larnec's capability well beyond standard applications. Working across multiple buildings and use cases within the same precinct, Larnec demonstrated its ability to:

- Support converted shipping container and modular builds
- Customise door and hardware solutions to suit varied operational needs
- Provide expert consultation, ensuring the right solution is selected for each environment

URBNSURF reflects the type of forward-thinking, high-profile developments Larnec is proud to be associated with — projects where durability, adaptability and quality partnerships matter.

THE OUTCOME

URBNSURF Melbourne stands as a benchmark destination, and Larnec is proud to have contributed to a precinct that brings together world-class sport, hospitality and retail in a bold, modular format.

By supplying access solutions designed to perform in demanding conditions, Larnec continues to support major construction partners, architects and developers looking for confidence, capability and long-term value.
